

## HLW - IP55 Outdoor Heaters

This short wave infrared heater has been developed to meet the requirements of today's needs for outdoor heating. The heater is weatherproof and is suitable to be used outdoors in any application; it is perfectly safe to be used in the rain and continues to work even when subject to intense water jets.

Using a quartz lamp especially tuned to give a warm colour of light it also delivers high energy instant heat. Unlike other outdoor products this heater has very low glare and users feel warm and comfortable from switch – on

The heater has a very good heat “footprint”- see over, whilst retaining compact dimensions to give opportunity for many different applications. The heater can be wall mounted, overhead mounted or fixed under parasols or awnings.

The heater combines a robust character with excellent design, making the product ideal for both commercial and domestic applications. For safety the heater is fitted with an attractive stainless finger guard for increased heat output compared with glass fronted models. The lamp is replaceable.

The heater can be controlled with dimmers, timers or PIR's. Please ask for details.

### Why should I choose a HeatLight Technology Infrared Heater?

**Safe**...No worries about pressurized gas or storing cylinders and unlike gas no annual servicing.

**Silent**...It's electric!

**Clean**...No smells and virtually maintenance-free

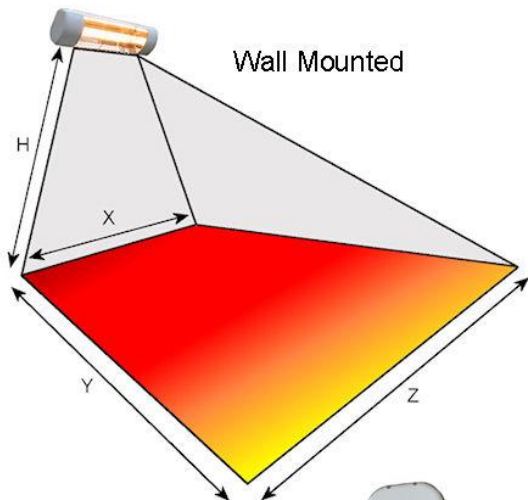

**Compact**...Clean and easy to store

**Effective**...Infrared warms instantly, giving a feeling of comfort from the moment it's switched on

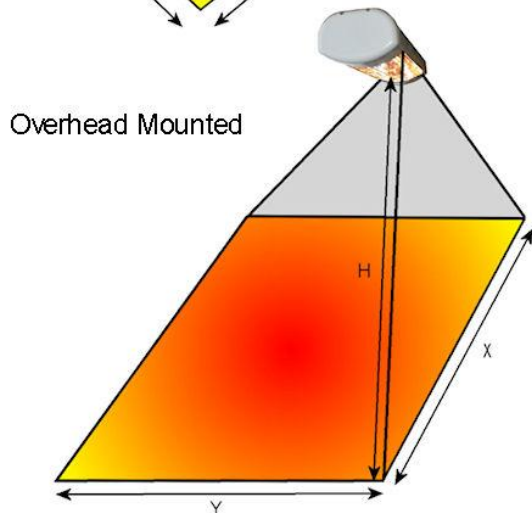

**Efficient**...Infrared warms the surfaces that it meets not the air - unaffected by draughts.

**Economical**...Low running costs - calculated at just 12 pence per KW hour. Approximately one third the cost of gas heating.

Wall Mounted

Overhead Mounted

## Area covered by the heater

Wall Mounted				Area Covered
H	X	Y	Z	
2.0m	2.3m	2.4m	4.0m	7.6m <sup>2</sup>
2.5m	3.0m	3.0m	5.2m	12.3m <sup>2</sup>
Overhead Mounted				
2.0m	3.6m	2.5m		9.0m <sup>2</sup>
2.5m	4.8m	3.5m		16.8m <sup>2</sup>

**HLWPARARM:-** Arm for mounting fitting to professional parasol.

This arm allows the heater to be mounted to the centre flange of Parasols and with a simple lift and twist action the heater can be lowered to the centre pole enabling the parasol to be shut without the need to remove the heaters first. Usually 3 or 4 of these arms and heaters are used per parasol.

### Available Models: -

**HLW10:** White 1000 watts, 220-240 volts. Heater complete with wall and parasol brackets.  
L 480mm x H 120mm x D 120mm (not including wall bracket)

**HLW15:** White 1500 watts, 220-240 volts. Heater complete with wall and parasol brackets.  
L 480mm x H 120mm x D 120mm (not including wall bracket)

**HLW15B:** Black 1500 watts, 220-240 volts. Heater complete with wall and parasol brackets.  
L 480mm x H 120mm x D 120mm (not including wall bracket)

**HLW15S:** Silver 1500 watts, 220-240 volts. Heater complete with wall and parasol brackets.  
L 480mm x H 120mm x D 120mm (not including wall bracket)

### Technical Specifications

Power Supply:- 220-240v 1000 or 1500 watt output

Weight:- 1.7 Kg

Lamp Life:- 5,000 Hours

All supplied with 3M mains cable, wall bracket and parasol clamp
